MANUAL

GETTING STARTED

The ZeFHiCK tool is easy to use and user friendly. Now let us see how to get started.

Project details | Standard linear graph | Test Sample | Model identification

Name of Drug	Paracetamol
Expt. Done by	Formulation Scientist
Date of Experiment	29-03-16
Total no. of Readings	5
pH of the Medium	7
Volume of Dissolution medium	30 ml (litres / ml)

RESET

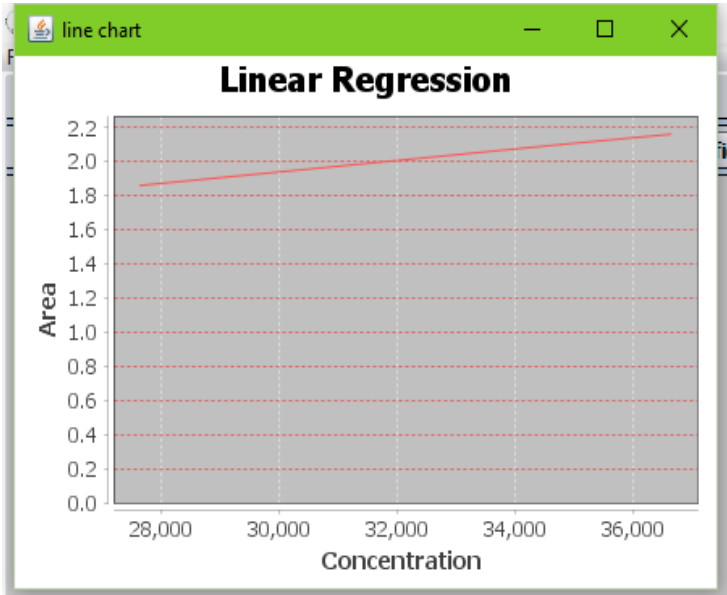
Save

Search the web and Windows

14:59
29/03/2016

- GO TO THE PROJECT MENU
- FILL IN THE PROJECT DETAILS AND PRESS SUBMIT
- VOLUME OF DISSOLUTION MEDIUM CAN BE GIVEN IN LITRES OR MILLILITRES

- A PDF FILE WILL BE GENERATED
- IF YOU WANT TO RESET THE DETAILS JUST CLICK ON THE RESET BUTTON



ication

Press Enter

Concentration (y)	Area (x)
2.16	36644
1.86	27643
1.98	31222
2.10	34777
2.14	36022
Press Enter	--

b=29939.9497

a=-28055.4171

y=-28055.4171+29939.94...

Formula y = mx+c

CALCULATE LINEAR REGRESSION

PLOT GRAPH

Calculate x for other y value

Enter the value of constant (y) = 2.1 **Calculate x**

(x) = 34818.47727

RESET

- GO TO THE STANDARD LINEAR GRAPH MENU
- YOU CAN GET THE STANDARD CALIBRATION CURVE AND LINEAR EQUATION
- INITIALLY GIVE THE NUMBER OF ENTRIES AND CLICK ENTER
- ON GIVING A MOUSE CLICK ON TITLE BAR OF THE TABLE THE ENTIRE TABLE APPEARS
- AFTER FILLING THE DETAILS, PRESS ENTER AND CLICK ON CALCULATE LINEAR REGRESSION BUTTON THE EQUATION WILL BE DISPLAYED
- ON CLICKING PLOT GRAPH, THE STANDARD CURVE APPEARS
- IF y VALUE HAS TO BE FOUND FROM THE GRAPH, THEN JUST ENTER THE x VALUE FOR WHICH THE CORRESPONDING y HAS TO BE CALCULATED
- ON CLICKING THE RESET BUTTON, THE ENTIRE TABLE VALUES WILL BE RESET

File

Project details | Standard linear graph | Test Sample | Model identification

RESET

Enter the number of observation: 5

Enter Dilution factor: 60

Enter initial concentration: 150

OK

Time	Area
2	36644
4	27643
6	31222
8	34777
12	36022
Press Enter	--

SUBMIT

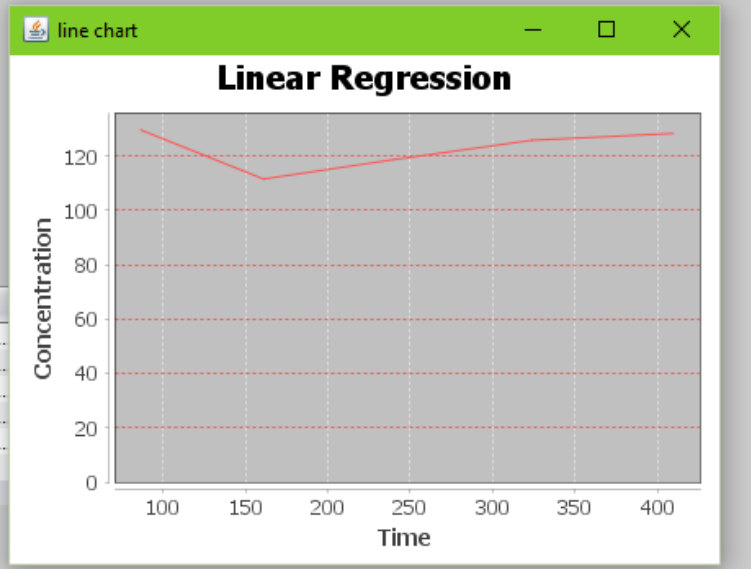
PLOT GRAPH



Search the web and Windows

15:06
29/03/2016

- GO TO THE TEST SAMPLE MENU, FILL IN THE DETAILS AND CLICK OK
- THE TABLE WILL BE GENERATED BASED ON THE NUMBER OF OBSERVATIONS GIVEN
- AFTER ENTERING THE VALUES CLICK SUBMIT
- CLICK ON THE TABLE TITLE BAR TO SEE THE RESULTS
- ON CLICKING PLOT GRAPH, GRAPH WILL BE GENERATED AND THE COMPLETE DETAILS CAN BE RESET BY THE RESET BUTTON
